

Attention: Dr. Bill Kennedy, Office of Accountability, OPIC, now DFC.

March 8th, 2020

Dear Sir,

We would like to express our disappointment that the U.S. Development Finance Corporation's (DFC's) Problem Solving process regarding our Leviathan complaint is now terminated due to Noble's withdrawal of its cooperation. Accordingly, we request that DFC conduct a full Compliance Review, to assess and clearly identify failures in the process used by OPIC in its consideration and approval of the Leviathan project. As is clear from the supporting documentation provided in our initial complaint, many citizens of Israel believe the process was flawed, and must not be repeated in future project consideration by the U.S. government. Specifically, we believe the Environmental Impact Assessment performed as part of the project was misleading and systematically omitted available information on the risks of building a gas processing platform in close proximity to the shore.

With kind regards,
